ERS LAST TRIP MODULE

Q152 In this section we are interested in the trips that you took to places with a freshwater body (such as a lake, pond, river, or wetland), and where the presence of this water was an important reason for the trip.

In other words, if a place you visited did not have a freshwater body, you probably would not have

taken the trip.

In the past 12 months, did you take any trips to visit a freshwater body (such as a lake, river, or wetland) within 100 miles of your (current) home?

These trips need not be overnight. Furthermore, please consider only trips where the presence of water was an important reason for going on the trip. By important, we mean that if a place you visited did not have a freshwater body, you probably would not have taken the trip.

The Wilderness Act of 1964 allows Congress to set aside certain undeveloped lands for their preservation as Wilderness areas. These areas provide benefits such as wildlife habitat, scientific research, and undeveloped outdoor recreation, such as hiking. Once these lands are preserved as Wilderness, they cannot be used for certain other purposes such as timber, developed ski resorts, or transportation routes.

Q282 From what you know about these areas, do you think that the amount of designated wilderness is not enough, about the right amount, or too much.

People choose recreation areas in order to achieve specific experiences. For example, a person may choose a city park to play softball, but an undeveloped site in a forest for camping. To make a variety of outdoor experiences possible, a variety of outdoor areas must be available. Some outdoor settings would need many facilities, be easy to get to, attract large numbers of people, and generally be very convenient. To provide different type of recreation

experiences, more primitive outdoor settings would require few or no facilities, be more difficult to get to, have few people, and offer very few, if any, conveniences.

With this in mind, for each statement that I read, please tell me whether you strongly agree (SA), agree (A), disagree (D), or strongly disagree (SD)

| 2. | Agree | 6. | DK, NA |
| 3. | Disagree | | |

Q330 Recognizing that individuals seek specific experiences through recreation settings that range from urban to primitive, levels of accessibility should be established to fit in with the setting (e.g. concrete sidewalks in urban settings and rough, dirt paths in primitive settings).

- | | | | |

| 1. | Strongly Agree | 5. | R |
| 2. | Agree | 6. | DK, NA |

The Wilderness Act of 1964 set aside certain land for the preservation of the American wilderness. These lands, known as the National Wilderness Preservation System (NWPS), are "protected and managed so as to preserve its natural conditions and which (1) generally appear to have been affected primarily by the forces of nature, with the imprint of man's work substantially unnoticeable; and (2) has outstanding opportunities for solitude or a primitive and unconfined type of recreation..." The Wilderness Act forbids the use of "motor vehicles, motorized equipment...other mechanical transport, and no structure or installation" within the National Wilderness Preservation System.

With this in mind, for each statement I read please tell me whether you strongly agree (SA), agree (A), disagree (D), strongly disagree (SD).

Q333 Trails in the National Wilderness Preservation System are built to limit the use of the National Wilderness Preservation System and to minimize damage to the environment. With this in mind, trails that exist within most National Wilderness Preservation System areas are no more than 24 inches wide. Do you strongly agree, agree, disagree or strongly disagree that these trails should be kept narrow to protect the environment even if they are too narrow for many wheelchairs.

- 3) At least one trail in each NWPS area
- 4) More than one but not all trails in each NWPS area
- 5) All trails in the NWPS area
